^{13}C NMR spectra of the copolymers were recorded in CDCl_3 at 100 MHz. The chemical shifts were measured relative to TMS. The assignments of the peaks were made on the basis of the chemical shifts of the corresponding homopolymers. The assignments of the peaks were made on the basis of the chemical shifts of the corresponding homopolymers. The assignments of the peaks were made on the basis of the chemical shifts of the corresponding homopolymers.
